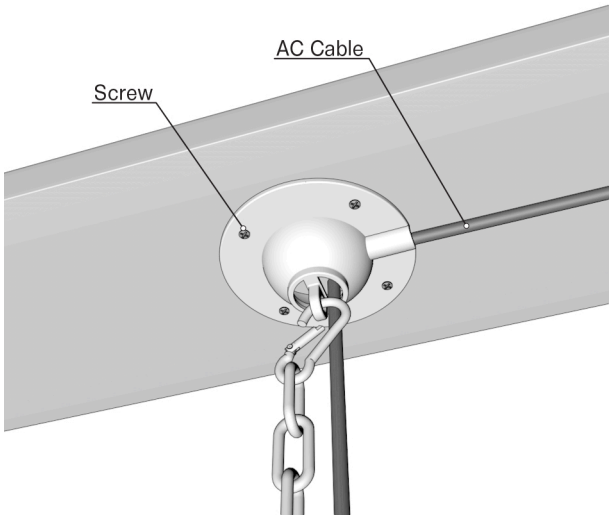
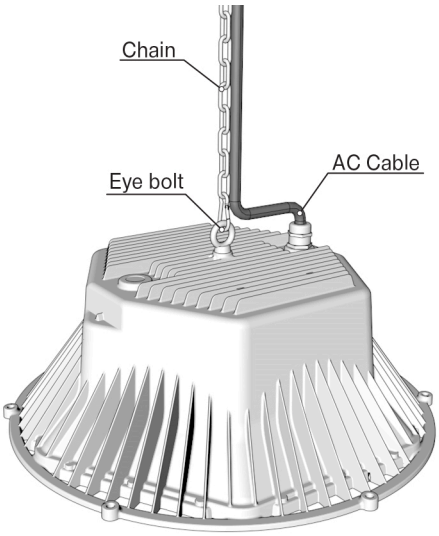
Installation method



- Shut off the main power before installing the product.
- Install the ceiling fixing bracket by using screws (Standard of the screw is 4.2mm)
- Place the AC power cable onto the bracket.
- Fix the chain to the bracket.



- Fix the chain to the eyebolt.
- Connect the AC power cable to the main power supply. (Refer to Page 1 "AC Power Cable")
- Finish by fixing the AC power cable to the chain.
- Check whether the lighting system keeps the level.
- Connect the product to the main power supply and check whether it operates correctly.
- Contact the manufacturer or the seller for inquiry when there is a problem with the product.
